

## DOCUMENT STATUS

The following documents were approved by the agencies during the past month:

- Western Early Transfer Parcel (WETP) 2010 Annual Report
- 2010 Annual RCRA/Facility Landfill Groundwater Monitoring Report

The following documents are under review by the agencies:

- Western Early Transfer Parcel Remedy Complete Certification Letter
- Draft Final Remedial Investigation Report for IR Site 05/Dredge Pond 7S/Western Magazine Area
- Draft IR Site 05 Time Critical Removal Action Completion Report
- Draft Investigation Area H1 Resource Conservation and Recovery Act (RCRA) Closure Certification Report
- Draft Investigation Area H1 CERCLA Remedial Action Completion Report

The following document is under review by the Navy:

- Draft Investigation Area H1 Post-Closure Permit Application/Post-Closure Care Plan

## IR SITE 05 ADDITIONAL EXCAVATION

Based on laboratory results of soil samples taken in February 2011 from geophysical survey anomaly locations within IR05, three locations were excavated this month to address soil with elevated petroleum hydrocarbons (diesel) at two locations and elevated lead at the third location. The total volume of soil excavated from the three locations was less than 150 cubic yards. The soil will be transported to an off-island landfill. Post-excavation confirmation samples of

the excavation floor and sidewalls were collected to ensure that all soil from the hot spots has been removed. Laboratory results for these confirmation samples is pending.

**Excavation to remove diesel contaminated soil at IR05**

## INVESTIGATION AREA H-1

Long-term maintenance and monitoring of IA-H1 continues, including collection of groundwater/leachate from the perimeter of the Containment Area, sampling/analysis of groundwater monitoring wells, inspection of vegetated cover soil and security of perimeter fencing, and other related activities.

**Vegetation established within IA-H1 Containment Area**
